A Williams & Pritchard Sebring Sprite

The Sprite car

Your article in the March issue was certainly a great tribute to the body craftsmen Williams and Pritchard. The bodywork described proved the quality of their craft and the extent of their work in the car industry.

On page 88, however, the Sebring Sprite illustrated was in fact one of the 1960 Falcon cars, driven by John Colgate and John Walton. I enclose a picture of one of the Williams and Pritchard Sebrings; six of these coupés were built, three for John Sprinzel and three for Brian Lawrence. Following a total restoration in 1983 I entered my Sebring in HSCC meetings successfully for three seasons, and it's now campaigned by Tony Whitehead, mainly on northern circuits.
